

# Energetic water can heal!

---

Peter J. Pejot

## No life without water

A modern nutrition without water is not possible at all! Do we know today why human beings mainly drank beer or water in the past? They drank it because water was much too dangerous to drink in these times. It was contaminated, dirty, infected with germs and bacteria and polluted with toxic substances, especially lead from water pipes.

## Which properties must healthy water possess?

It must be free of harmful substances, low in minerals; it must have a healthy structure also called crystalline structure. Water fulfills lifesaving functions in our organism. Its most important task is the capability to transport nutrients to our organs as well as transporting toxins and waste materials to the excretory organs such as kidneys, intestines, skin and lung. Through this mechanism the connective tissue will be cleaned and an acidification of the body will be prevented. These operations can only be done with the help of energetic water. Tap water and pet bottled water are without energy and don't bind the slag in the body. (See pictures 1+2: pictures of water crystals.)

Lifestyle diseases such as heart attack, stroke; cancer or osteoporosis are inseparable connected with this condition of slugging and acidification of the body. A further important property of energetic water is the transmission of information from cell to cell.

This property distinguishes a true liquid food because food doesn't mean anything else but „life agent" or "elixir of life". We, as health care practitioners, life scientists, doctors and therapists can confirm that the quality of the water we drink has a decisive effect on our health.

## Which effects does energetic water have?

Already in 1996 Dr. Gotthard Eckl noted in a field report that the energy water supports the process of losing weight. Last but not least energy water is used as a therapeutic agent in the Austrian cancer clinic of Dr. Volkmar Alexander Wirth. (Energetic water is well accepted).

## Absolutely no side effects

Dr. Gotthard Eckl from Linz / Austria already stated end of 1996 the following:

"According to my experience the oxygen-enriched water has a positive effect on the human organism and is completely without side effects."

The doctor pointed out the following effects of energetic water:

- improvement of bowel movement without medication
- raising the general energy level
- reduction of morning fatigue
- higher general and athletic performance
- special efficacy in psychosomatic discomfort
- advantageous for overweight persons
- positive for patients who have to undergo chemotherapy or radiotherapy due to malignant tumors

With our own individual selection of water that we drink we take the responsibility for our health back into our own hands again. A group of researchers of Harvard University in Cambridge, US confirms the following:

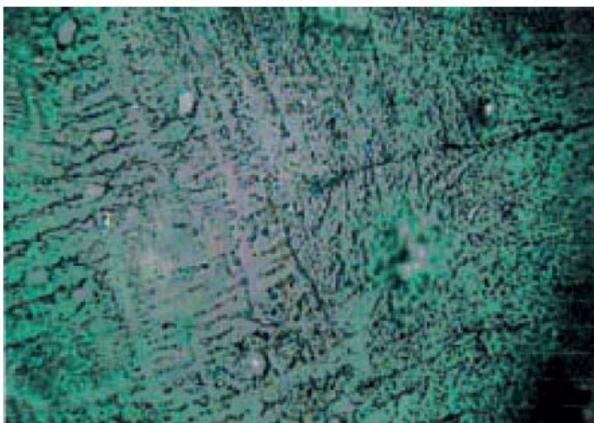

"Persons who drink water which is poor in minerals, free of harmful substances and that are non-carbonated lower their risk of cancer by 80 % and improve their immune status within 4 weeks by 50%."

This was also confirmed by the last symposium of the DGEIM, which had the topic: "Is cancer curable?"

Furthermore, it has been confirmed in a series of tests with 30 patients of the Institute of Bio Resonance (M. Schwarzl) that only energetic water is directly absorbed by the cells and that the time for detoxification is shortened by 3 to 5 times.

## Thus the energetic water can be called "Healing Water".

Today, we know that the energetic status of the water is dependent on its cluster structure (Cluster = molecular groups), which is changed through movement or stagnation

Picture 1: Tap water, PET bottle with 90° angles

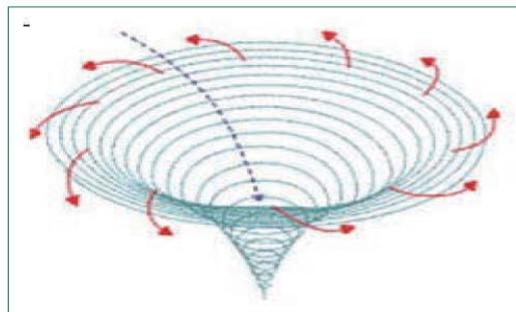

Picture 2: energetic water with 60° angles

This change in the molecular cluster structure constantly happens in our high-tech world from the source to the water tap. ..."

"The basic ideas go back to the forester Viktor Schauberg from Austria, born in 1885, who died in 1958. He already admonished about 50 years ago to move away from the unilaterally operated "explosion technology" towards a "natural technology", according to the motto: understanding nature, then copying it. He invented the following saying: "you move wrong."

In nature you do not find perfect closed circles and no straight lines (unless they are made by humans). As practiced in today's technology circular motion (centrifuge) produces centrifugal and pressure forces (see chain carousel) and causes the structure relaxation. Movement operations from the outside to the inside go (centripetal) causes a compression structure.....,Tab water and PET bottled water moves centrifugally and thus explosive –thereby without energy.

Picture 3: Water vortex centripetally = left hand rotation

In nature water is purified by spiral movements. This unique shape of the turbulence is also simultaneously a cleaning process. The moving-through-the water reaches a speed of 2 km / sec. In this huge resulting pressure, not only the water clusters are reduced, but also the non-toxic pollutants are dissociated into single molecules.

This was not only confirmed in the thesis Dipl. Ing Peter Rose 04.06.2004 but also in the crystal analysis of HAGALIS 09.11.2004

Also the aging of the skin is slowed down by the consumption of pure spring water. Energy water is an all-rounder - like a very good naturopath. As a spray it helps to heal injuries faster by causing a three dimensional wound closure. It allows a better blood circulation of the skin; it becomes softer, clearer, purer and more beautiful. But the water also increases the overall blood circulation; it optimizes your metabolism and improves the digestion of fat. When you consider that the brain consists of 90% water, is obvious that the energy water is responsible for the better flow of thoughts. It not only helps athletes, but also office workers, managers, students or housewives with fresh thinking. Persons who sit at a desk should put down a jar or a bottle of energetic water to drink more automatically. Whoever drinks more than two liters a day doesn't do anything wrong for sure.
